- In recent times, increasing numbers of food and clothing packages have arrived in Yugoslavia, sent in many cases by individual Americans to relatives and Triends. Humorous packages have been found to contain copies of the American publications Scholman and Sicholman Rec. which sharply criticize the procent Eugoslav returns. The fugo our riminary or rowsignizations will appropriate one considered a new reactice for paradiag propagands unfoverable to the regime.
- 2. CARE distributed over 15.000 packages in Yugorlavia as of mid-February 1951. Apparently, the distribution has caused considerable discontent insamich as favoritism allegedly was shown to adherents and loyal followers of the regime.
- 3. American aid has been received favorably in Serbia, where the people express sympathy for America at every public gathering. These people have always been basically sympathetic towards America and the aid program has done much to give voice to their feelings.
- American aid is being distributed primarily to the passive areas of Bossia, Hercegovina, Montenegro, Creatia and Slovenia. In Belgrade beans and powdered eggs have been distributed and the market prices have been affected. It is rumored in Belgrade that about 300 trainloads of flour are stored in Hontenegro, while officials there explain that the flour was not distributed because of transport difficulties brought on by heavy snows. This has now come to be known as the Crnagorska affair (Montenegro affair) and an invostigation has been ordered by the Ministry of Foreign Commerce in Bolgrade, where sabotage is suspected because it is well known that contain quarters wish to minimize the aid being extended by America.
- 5. The Yugoslavs are currently negotiating with Ingland for a shipment of sugar, Regardless of the outcome of the negotiations, the present sugar ration will have to be reduced because of the low stock on hand.
